

Dear Recruiting Team,

I am writing to apply for the Web Developer Trainee as advertised. With a strong academic foundation in computer science and a keen interest in software development, I am confident that my technical skills and practical experience make me a strong candidate for this role.

I graduated from Hong Kong Baptist University with a Bachelor of Science (Honours) in Computer Science, concentrating in Computing and Software Technologies. My academic training has equipped me with proficiency in a wide range of programming languages, including but not limited to Java, JavaScript, HTML, PHP, Python, JSP, Kotlin, C#, and SQL.

During my industrial attachment, I gained valuable hands-on experience in practical application development. I was responsible for designing and developing a uniform management system based on user requirements. This project enhanced my ability to translate business needs into functional solutions, strengthened my communication skills through stakeholder engagement, and deepened my understanding of full-cycle software development processes. Notably, I successfully launched the application on schedule despite tight deadlines, demonstrating my ability to deliver results under pressure.

Additionally, while pursuing my studies, I gained practical working experience as a part-time Programmer and IT Support Specialist. In these roles, I was responsible for designing IT solutions, fixing vulnerabilities, and performing application migrations. I also built automation flows using Power Automate to streamline business processes and improve operational efficiency.

Furthermore, my final year project provided me with an excellent opportunity to develop a mobile application integrated with an AI chatbot and machine learning development. I had the chance to customize image classification models and test the reliability of each model. This project strengthened my skills in mobile development, machine learning, model optimization, and intelligent system integration, enabling me to deliver a more interactive and intelligent user experience.

I would welcome the opportunity to discuss how my background and skills align with your needs. Please find my full CV attached for your review. I am available at your earliest convenience for an interview and can be reached at 9089 2958 or rayhung2014@gmail.com.

Thank you for your time and consideration. I look forward to the possibility of contributing to your team.

Yours faithfully,

Hung Siu Lun
